

# **METHOD AND SYSTEM FOR PERFORMING INFORMATION EXTRACTION AND QUALITY CONTROL FOR A KNOWLEDGE BASE**

## **ABSTRACT OF THE DISCLOSURE**

5           The present invention relates to the field of information extraction and storage  
and more specifically to techniques for extracting information from a plurality of articles in a  
distributed manner and for storing the extracted information in an information store. an  
embodiment of the present invention identifies a plurality of articles from which information  
is to be extracted and a plurality of information extractors for extracting the information from  
10 the articles. A database is provided for storing information related to the plurality of articles  
and the plurality of information extractors. The plurality of articles are assigned to the  
plurality of information extractors for information extraction. Information extracted by  
information extractors from the articles is stored in the information store.
